

## Scientist, risk assessment and nutrition, Rome, Italy

**Hylobates Consulting** is a food safety and nutrition consulting firm based in Rome, Italy. Since 2003, Hylobates specializes in risk assessment as well as scientific and regulatory consulting. Our clients are offered state-of-the-art scientific and regulatory knowledge in food safety, risk assessment, on labelling and health claims for food supplements, dietetic products and other foods. We have a permanent staff of 6 people.

We are involved in **European research projects** in nutrition and food risk analysis. Our research consulting group tackles complex food risk assessment and food safety/nutrition policy issues.

We are currently recruiting for a scientist to participate in **projects relating to nutrition and risk-benefit assessment**. The candidate in this position will be mainly working on two projects in the area of micronutrients and botanicals. Duties will include quantitative modelling with specific risk software, literature searches, use of web tools, and writing technical briefings and reports. This position offers significant opportunities for professional and scientific growth and requires both original thinking and detailed analytical working skills.

Qualifications for this position include:

- \* BS degree in Biology, Chemistry, Nutrition, or a related field; Masters or PhD degree preferred
- \* Strong quantitative skills; familiarity with database programs and modeling software (e.g., Analytica) preferred
- \* Strong computer skills, specifically with Microsoft Word, Excel, and Power Point
- \* Ability to manage multiple assignments under rigid time constraints
- \* Ability to participate effectively in large team projects is essential
